

Write an outline of the design process for your CO2 Car Project.

- **Include details about specific materials and tools you used.**
- **What specific steps did you go through to draw out your design.**
- **What did you have to include on your design to get approval.**

Entry Task

Pen Project Problem Prompts

Explain what you are making with specific details.

- What is it?
- What is it made from (material)?
- What were your choices about the project? (describe all possible choices - not the one you chose)
- What measurements were required (both maximum and minimum)?

Entry Task - Fri., Mar. 6

Outline the rest of your process activities.
Outline a description of your project.

- What machines have you used on your project?
- How did you use them (specific operations)?
- Why did you use that tool?
- What does your design look like, how big is it, what specific material did you choose, how is it turning out?
- Is your design matching what you drew, or has it changed due to mistakes in your work?
